PROFESSIONAL SUMMARY

Frontend-focused engineer with about 3 years of hands-on React, Next.js, and TypeScript experience, with end-to-end ownership across authentication, APIs, realtime systems, and production deployment. At **Phrontier AI** I owned frontend across **2 Next.js apps**. Independently I designed, built, and launched **Sameward** — a live workspace with Socket.IO chat, session auth, Channel AI, and production deployment. Targeting **Frontend Engineer / Product Engineer** roles.

INDEPENDENT PRODUCT EXPERIENCE

Sameward — Independent Product Engineer

01/2025 - Present

Live product · Next.js · TypeScript · Node.js · Socket.IO · MongoDB · OpenAI · Railway · sameward.com

- Product:** Designed, built, and launched a live workspace for team chat, files, and Channel AI in one place — instead of splitting that context across separate tools.
- Realtime split:** Built the Next.js product surface (pages + REST Route Handlers) and a separate Node.js Socket.IO service for messages, typing, and presence, keeping long-lived connections outside the Next.js request lifecycle.
- Auth handshake:** Implemented HttpOnly session cookies with hashed tokens in MongoDB, Google OAuth, workspace RBAC, and membership checks on the Socket.IO handshake before a client can join a channel room.
- Channel AI:** OpenAI assistant scoped to a channel the user already can access — summarize, catch up, ask, and draft from recent talk and public shared links; it never posts until the user hits Send.
- Ship:** Production deployment of Next.js and Socket.IO as two Railway services so they can be moved independently later; chat files via AWS S3 presigned uploads; auth email via Resend. Frontend tests with Jest and React Testing Library (components, forms, API loading/error states).

PROFESSIONAL EXPERIENCE

Frontend Engineer · Phrontier AI (formerly Profolo)

01/2025 - 07/2026

Hyderabad, India · AI talent / hiring platform · Direct hire (same codebase as prior staffing role)

- Frontend architecture:** Led frontend for a 3-person FE team across 2 Next.js apps and 3 roles — shared session model, design system, GraphQL client patterns, and feature-based structure.
- Sessions & product:** After deploys, brief API gaps no longer sent logged-in users to login (wait, retry, restore). Shipped WebSocket chat and an ATS Copilot with streaming replies (OAuth, OTP, RBAC).
- Team delivery:** Worked with backend, AI, and product on API contracts; wrote onboarding and 15+ module docs used across the team.

Frontend Developer · Innoclique Cognitive Technologies Pvt. Ltd

07/2024 - 12/2024

Hyderabad, India · Staffing on Profolo (now Phrontier AI) — converted to direct hire

- Primary frontend contributor on the same dual-app platform for 6 months (auth, onboarding, dashboard, profile); converted to full-time at Phrontier AI on the same codebase.

Frontend Developer · Codegene Software Solutions

02/2024 - 07/2024

Hyderabad, India · Top Wallet (crypto wallet web app)

- Built production React / Next.js UI for Top Wallet over 5 months — reusable components, REST integration, code reviews, and manual QA.

TECHNICAL SKILLS

Frontend: React, Next.js (App Router), TypeScript, JavaScript, Tailwind CSS, shadcn/ui, ARIA

Backend & Data: Node.js, Express.js, MongoDB, Mongoose, Next.js Route Handlers

Auth, AI & Testing: OAuth, HttpOnly sessions, RBAC, OpenAI (Channel AI), Jest, React Testing Library

State & APIs: Redux Toolkit, RTK Query, TanStack Query, GraphQL, REST APIs

Realtime: Socket.IO, WebSockets, channel rooms, typing and presence

Cloud & Tooling: Railway, AWS S3, Resend, Vercel, Git / GitHub

INTERNSHIP

Full-Stack Developer Intern · Edureka

05/2023 - 02/2024

Remote, India

- 10-month MERN capstone (React, Redux, Node.js, Express, MongoDB).

EDUCATION & CERTIFICATIONS

BBA, Marketing and Finance · Andhra University · 08/2020 - 05/2023 · CGPA 8.0/10
