PROFESSIONAL SUMMARY

Frontend Engineer with 3 years of experience building production-grade web applications, including 18+ months on an enterprise platform under active development. Currently at Phrontier AI (formerly Profolo), contributing to 2 Next.js client applications on a single GraphQL backend. Strong in TypeScript, Next.js App Router, Redux Toolkit, RTK Query, WebSocket integration, authentication, feature-based architecture, and reusable component systems. Self-taught engineer from a BBA background. Targeting Frontend Engineer II and Senior Frontend Engineer roles.

TECHNICAL SKILLS

Core: TypeScript, JavaScript (ES6+), React, Next.js (App Router), HTML5, CSS3	State & Data: Redux Toolkit, RTK Query, Redux Persist, GraphQL, REST APIs, WebSocket, optimistic updates, cache invalidation, error handling
UI & Forms: Tailwind CSS, shadcn/ui, React Hook Form, Zod, responsive design, accessible form patterns, loading and empty states	Platform: Authentication (HttpOnly sessions, OAuth, OTP), RBAC route guards, server actions, cloud file uploads, custom hooks, error boundaries, performance-conscious rendering
Practices: Feature-based architecture, component-driven development, SOLID principles, code reviews, technical documentation, Agile/Scrum, Git, GitHub	

PROFESSIONAL EXPERIENCE

Frontend Engineer Phrontier AI (formerly Profolo)	Jan 2025 – Present
Hyderabad, Telangana, India	
- Architected dual Next.js client apps serving 3 user roles — unified API layer, session model, and design system without duplicated infrastructure between codebases - Resolved post-deploy session loss through HttpOnly cookie recovery, device fingerprinting, server-side validation, Redux Persist bootstrap, and RBAC route guards on both clients - Designed deploy-safe auth flows: OAuth, email OTP, post-login redirects, and centralized 401 handling for all API clients - Created a real-time conversational assistant UI — dedicated WebSocket channel, streaming states, rich rendering, context-aware input, and 4 pluggable action-widget types tied to parent workflow refresh - Wired messaging layer with optimistic sends, unread sync, and 2 isolated connection scopes separating chat from workflow-assistant traffic - Unified RTK Query patterns — tag invalidation, user-switch cache resets, optimistic mutations — on feed, notifications, and messaging (3 high-traffic surfaces) - Constructed multi-stage pipeline boards, URL-driven detail panels, bulk upload with per-file progress tracking, and searchable tables with persistent filters for recruiter workflows - Launched 4 candidate modules: global search, profile and verification forms, assessment state views, and responsive dashboards with URL-synchronized navigation state - Codified team engineering standards — custom hooks, reusable form components, error boundaries, feature-scoped organization — adopted in 8+ product modules	
Frontend Developer Innoclique Cognitive Technologies Pvt. Ltd	Jul 2024 – Dec 2024
Hyderabad, India Staffing assignment: Profolo (enterprise platform)	
- Released onboarding, dashboard, and profile features over a 6-month staffing period on a large-scale internal platform under active development - Aligned with design, QA, and backend teams on API integration and sprint delivery ahead of direct hire on the same codebase	
Frontend Developer Codegene Software Solutions	Feb 2024 – Jul 2024
Hyderabad, Telangana, India	
Produced responsive React and Next.js interfaces for 2 client apps in 5 months — REST service integration and a common component library reused between both codebases	

SELECTED ENGINEERING WORK

Enterprise Web Platform — Phrontier AI (formerly Profolo)

Next.js · TypeScript · GraphQL · Redux Toolkit · RTK Query · WebSocket · Tailwind CSS · shadcn/ui

- **Scale:** 2 production clients on 1 backend; feature-based modules; centralized Redux store with RTK Query API slices
- **Security:** Multi-role route guards, session persistence, profile-completion gating, cross-tab logout synchronization
- **Live data:** WebSocket UIs, optimistic mutations, notification cache merging, low-latency assistant panels
- **Reliability:** Error boundaries, deploy-safe auth bootstrap, URL-driven navigation state, cloud-backed uploads, internal module documentation

Platform under active development. Legal employer on offer letter and payslips: Profolo.

INTERNSHIP EXPERIENCE

Full-Stack Developer Intern | Edureka

May 2023 – Feb 2024

Remote, India

- Completed a 10-month certified full-stack program and built an e-commerce capstone with React, Redux, Node.js, Express, and MongoDB covering 10+ end-to-end user flows

EDUCATION & CERTIFICATIONS

BBA, Marketing and Finance | Andhra University | Aug 2020 – May 2023 | CGPA: 8.0/10

Full Stack Web Development Internship Program | Edureka | Jan 2024
